

An Owner / Builder's Guide to Creating Construction Plans

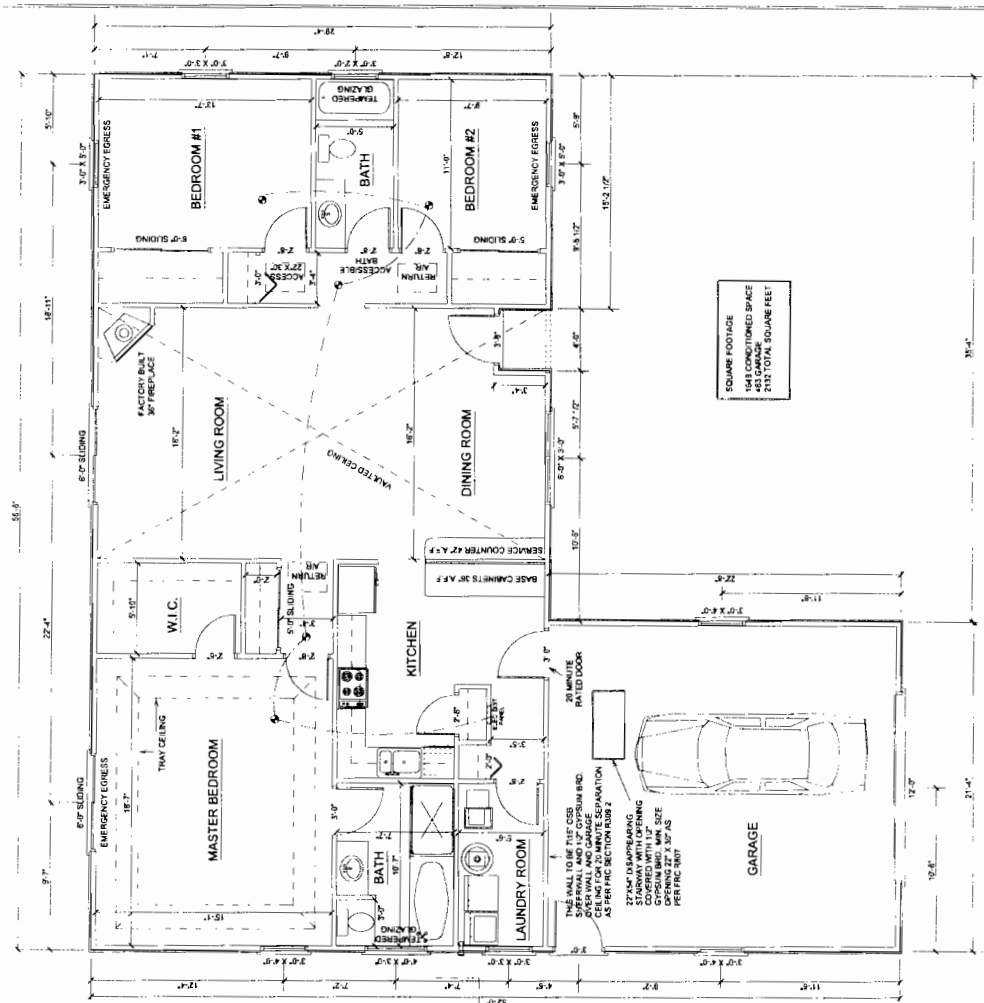

The following samples are provided as a guide to help the owner builder prepare plans and details for residential projects.

Plans must be drawn to scale with enough clarity and information so a plans examiner or inspector can understand what is being constructed.

Drawn to Scale – 1/4" on paper = 1 foot actual size

DISCLAIMER

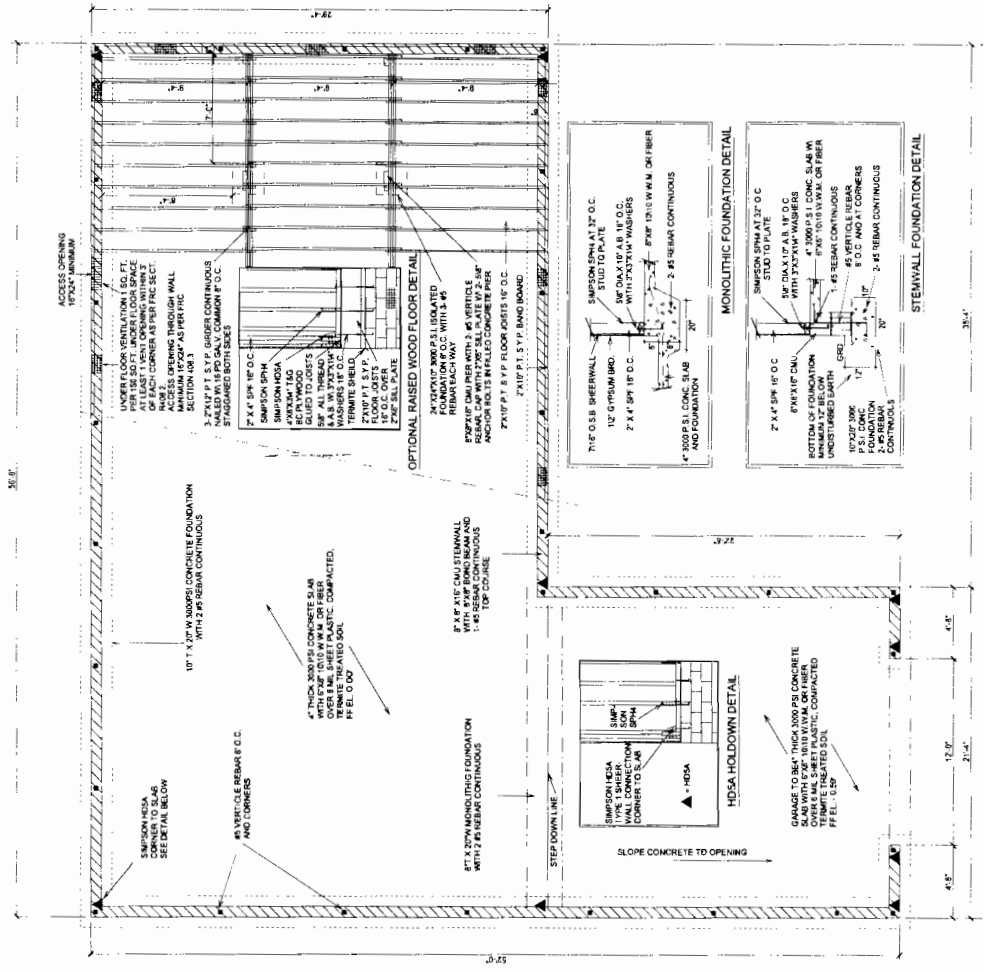

The information provided in this handout is a sample representation of typical details required in plans submitted to the Building Department for a permit. The information is not intended to provide code requirements or design recommendations.
